

COVID-19: BUSINESS AS USUAL AT THE RIVA DEL GARDA CONGRESS CENTRE

Work continues as usual at the Riva del Garda Congress Centre. We have adopted the precautionary measures indicated by the World Health Organisation, The Health Ministry and the Autonomous Province of Trento, putting in place all appropriate measures in order to guarantee the health of all of our employees, suppliers and clients.

Health measures

The Congress Centre has increased all measures for hygiene and sanitisation, both during events and also to ensure every day environmental healthiness:

- Additional sanitisation of the venue with ozone, in addition to the daily sanitisation of toilets and air filtration.
- The presence, in all public areas and all toilets, of dispensers containing a no-rinse, hygienic, biocide foam soap with European certification.
- A special reserved area for guests where thermometers to measure body temperature are available.
- The installation of informative posters indicating measures recommended by the health authorities.

Mobility

To further guarantee the smooth running of both national and international events, we undertake to facilitate access to the destination:

- Our incoming office will increase the number of group shuttle services, with sanitised vehicles, from alternative airports, to ensure utmost flexibility depending on the provenance of participants.
- Thanks to the fact that the hotels are easy to reach on foot from the congress venue, there is no need for bus transfers, leaving each participant free to come and go independently in the fresh air. It is also possible to use the bicycles provided by the congress centre and hotels.

Direct streaming

For those who are unable to take part personally in events, we will make digital services available, thus facilitating remote participation.

- We offer the opportunity to activate a streaming service in order to follow our congress proceedings.

Given that the situation is subject to ongoing change, we will continue to remain vigilant and will actively endeavour to reconcile guests' needs with existing health provisions and to communicate with all interested parties in a timely manner.
